*Tabish Khan the @LondonArtCritic has picked five exhibitions to see in London. Each one comes with a concise review to help you decide whether it's for you. There's still time to catch all of his [recommendations from last week](#) and most of his [Mayfair recommendations](#). All exhibitions are free to visit, some may require booking ahead. No end dates are provided as it is currently unclear if they will re-open post-second lockdown.*

[William Mackinnon @ Simon Lee](#)

Sun bleached landscapes of his native Australia capture the barren landscape so well it's as if you can feel the heat radiating from them. The fantastic paintings were painted by Mackinnon while he was isolating during lockdown and it only seems fitting to see them before we go into another one.
